Vaccine tracker: 32.6 percent of the U.S. has received first dose

As of April 6, CDC data shows 32.6 percent of Americans have received at least one Covid-19 vaccine dose, and 19 percent of the total U.S. population has been fully vaccinated. Vaccination rates are higher for the 65-and-older group: 75.9 percent of older adults have received at least one dose, and 56.6 percent are fully vaccinated. President Joe Biden declared in March that the U.S. will have enough vaccine for every adult by the end of May, moving up his previous timeline by two months.

168.6M vaccine doses have been administered as of April 6
DOSES ADMINISTERED

63M Americans, or 19 percent, are fully vaccinated
NUMBER OF PEOPLE

*The vaccine manufacturer was not reported for about 35,000 vaccine recipients, according to the CDC.
