# U.S. companies lead world in carbon-neutrality pledges

At COP26 in Glasgow, Scotland, more companies pledged to neutralize carbon emissions from their activities. On the investment front, an alliance of banks, asset managers and investors — who collectively manage

\$130 trillion in assets — set a goal to eliminate or offset all greenhouse gas emissions by 2050. They plan to shift private investment dollars to support clean energy, end deforestation, halt overseas oil and gas finance and abandon coal-fired power. But corporate policies, metrics and transparency can be ill-defined and problematic, warn climate activists.

## Oil and motor companies trend at the back of the pack among companies pledging to end their excess greenhouse gas emissions

Net Zero Tracker, a collaboration of nonprofit climate policy, research and analysis organizations, keeps track of company pledges for emissions reductions. The chart below includes more than 650 companies whose goals are "net-zero," "carbon neutral," "climate-neutral," "1.5° C target" or "science-based target," and include a target date.

BY ANNUAL COMPANY REVENUE, IN TRILLIONS OF U.S. DOLLARS

BY ANNUAL COMPANY REVENUE, IN BILLIONS OF U.S. DOLLARS

### STATUS OF GOAL

#### Achieved\*

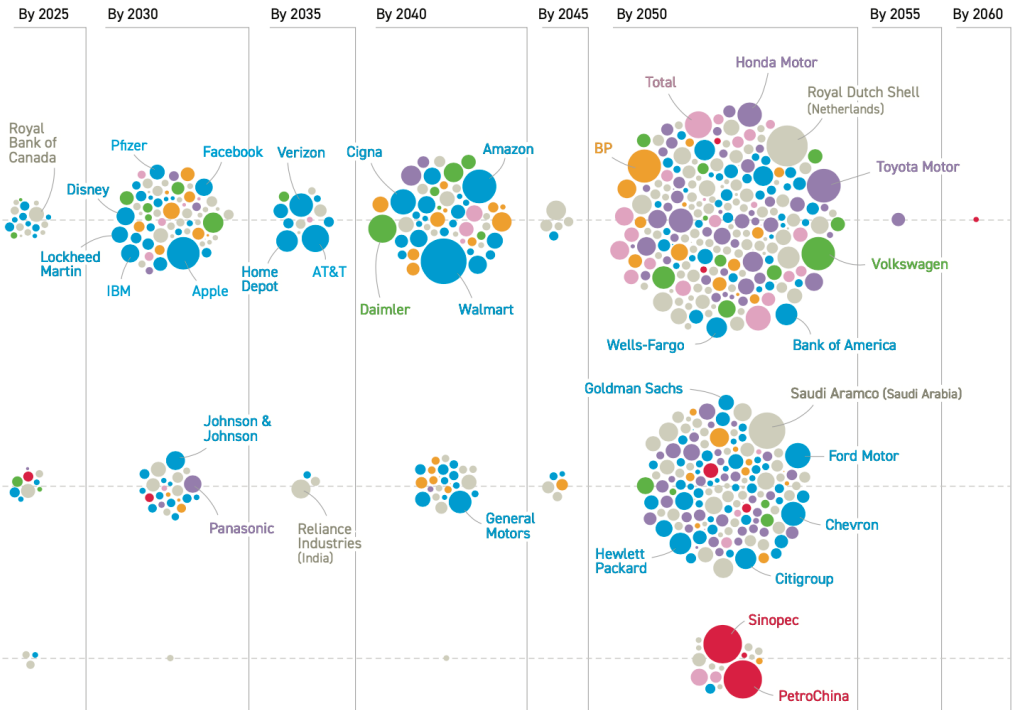

#### In corporate strategy

#### Declaration or pledge

#### Proposed or in discussion

### END TARGET YEAR
